

We have a better solution...

from the very moment of collapse the clock starts ticking!

PORTABLE

equates to having better patient outcome due to the quickness of the response time. The first level of health care response is critical for out-of-hospital medical emergencies.

Our goal at Nasiff Associates is for you to be able to:

- encounter a cardiac emergency and have the ability to triage the situation quickly
- expedite getting your patient to the emergency room
- arrive with an ER staff prepared to quickly and efficiently care for your patient

Our products are secure and protected from being compromised. That is how you can spend your time focused on your patients and saving lives.

... the Nasiff CardioCard ECG PC-based Solution

a portable cardiac monitor that will help Hospitals, Tele-health, Home-care, Medical Offices, Emergency Services and others communicate critical findings in real-time. By performing these tests at the patient's point of care, physicians can accelerate treatment plans which may increase survival rates in heart

disease cases. Nasiff Associates remains on the cutting edge with the CardioCard ECG capabilities, a fully interpretive PC-based system. Our system gives you the ability to perform your tests using our Bluetooth, Wi-Fi or USB technology. Our in-house support team is unsurpassed, responsive, trained and available to provide you with what you need via phone or internet. You receive the customer care you deserve. Every device, system and service has been skillfully developed and made in the USA.

3 Point CardioCard® Product Solutions Program

how the Nasiff CardioCard® can work for you!

One of the greatest challenges is providing quality, easy, quick and cost-effective healthcare devices in an ever rapidly evolving healthcare environment. Helping you care for your patients while saving money, time and lives...

✓ RELIABLE...

all Nasiff cardiology products are designed to last a lifetime. We put our devices through a very rigorous testing process to ensure the best durability in most environments.

✓ FAST RESPONSE...

all Nasiff cardiology products are fast, streamlined and integrated. We can save you time doing tests, getting diagnostics and sending them electronically.

✓ LIGHT WEIGHT...

all Nasiff cardiology products are easy to use, affordable, lightweight, and portable. You take any of our devices directly to the point-of care.

"Finally ... we can focus on what is important to us – our patients..."

Warranties are for CardioCard® products only. All third party products have their own warranties.
